

of AI, enables machines to learn patterns from data. Deep Learning (DL) uses neural networks to model complex representations. Retrieval-Augmented Generation (RAG) enhances language models by combining retrieval and generation to improve factual accuracy and reduce hallucination. This is a compact 1000-word document designed for testing RAG pipelines, including chunking, embedding, hybrid retrieval, and context construction. Artificial Intelligence (AI) has become a transformative force across industries. Machine Learning (ML), a subset of AI, enables machines to learn patterns from data. Deep Learning (DL) uses neural networks to model complex representations.

Retrieval-Augmented Generation (RAG) enhances language models by combining retrieval and generation to improve factual accuracy and reduce hallucination. This is a compact 1000-word document designed for testing RAG pipelines, including chunking, embedding, hybrid retrieval, and context construction. Artificial Intelligence (AI) has become a transformative force across industries. Machine Learning (ML), a subset of AI, enables machines to learn patterns from data. Deep Learning (DL) uses neural networks to model complex representations. Retrieval-Augmented Generation (RAG) enhances language models by combining retrieval and generation to improve factual accuracy and reduce hallucination. This is a compact 1000-word document designed for testing RAG pipelines, including chunking, embedding, hybrid retrieval, and context construction. Artificial Intelligence (AI) has become a transformative force across industries. Machine Learning (ML), a subset of AI, enables machines to learn patterns from data. Deep Learning (DL) uses neural networks to model complex representations. Retrieval-Augmented Generation (RAG) enhances language models by combining retrieval and generation to improve factual accuracy and reduce hallucination. This is a compact 1000-word document designed for testing RAG pipelines, including chunking, embedding, hybrid retrieval, and context construction.
